

CAPABILITIES

Since 1997, RESOLUTE PARTNERS has designed, engineered, installed, and operated secured wireless & wired networks designed to meet demanding mission-critical objectives, improve operating efficiencies, reduce costs, and create platforms for emerging applications and new technologies from energy management and controls to the Internet of Things (IOT).

RESOLUTE MAKES COMPLEX NETWORK INSTALLATIONS EFFORTLESS DELIVERING TURNKEY SOLUTIONS FOR OUR CLIENTS

RESOLUTE's operational experience and depth of technical knowledge allows us to respond quickly to changing customer needs against evolving industry standards.

DIFFERENTIATORS

- Experienced, having provided networks and services on more than 50 military installations across the U.S., Germany, Kuwait, and Iraq.
- NIST 800-171 compliant
- Scalable across multiple network environments
- Global capabilities

NAICS CODES

HIGH SECURITY GOVERNMENT NETWORKS

RESOLUTE designs and engineers high-reliability, secure and encrypted, wired and wireless networks and Internet access that meet Government security requirements (FIPS, NIST, RMF).

WI-FI AND WIRED NETWORKS

RESOLUTE provides high-reliability, cost-efficient wired and wireless networks and Internet access for military installations, commercial locations, public buildings and locations, and dormitories and campuses.

VIDEO SECURITY NETWORKS

RESOLUTE engineers and installs reliable, scalable, IP video security networks with purchase or lease options. Provides ongoing monitoring, support, and maintenance as well as Video as a Service (VSaaS), which delivers a turnkey managed video surveillance solution at a fixed monthly cost.

ENERGY MANAGEMENT CONTROL SYSTEMS

RESOLUTE designs, engineers, installs, and provides ongoing support for environmental and IoT network systems and equipment.

CYBERSECURITY / RMF NETWORK SOLUTIONS

RESOLUTE provides advanced cybersecurity systems and security engineering expertise to agencies to design, install, and secure mission assets to achieve ATO within the Federal Government's Risk Management Framework (RMF).

BROAD RANGE OF NETWORK SERVICES & SUPPORT

WAN/WLAN Networks • Comprehensive Site Surveys • Network Engineering and Design
• Cloud Solutions • Hardware Procurement • Systems Deployment • Network Installation/
Integration • ISP Circuit Provisioning • Project Management • Detailed Documentation •
Monitoring • Remote and On-site Support

PAST PERFORMANCE

JOHNSON CONTROLS

As Subcontractor, RESOLUTE provided secure wireless data network for Energy Management and Control Systems at Marine Corps Air Ground Combat Center 29 Palms. Provides network installation and maintenance since 2010.

Contract # W912DY-11-D-003

Reference Brandon Saunders, Project Manager

JCI Federal
